

Family Wealth Planning

We guide families and fiduciaries through life's most important financial decisions, protecting wealth while positioning it to serve future generations.

Trusted Advisors for Families and Fiduciaries

Our team advises on all aspects of family wealth planning, including estate and gift strategies, trust and estate administration, business succession and charitable giving. We work with executives of public companies, owners of closely held and start-up businesses, multigenerational families, trustees, private foundations, charitable organizations and other clients navigating complex wealth planning decisions. These matters often involve complex assets, sensitive relationships or international considerations that require coordination across legal and financial teams.

Clients turn to us when decisions are nuanced and the details matter. We start by understanding each client's goals, identifying risks early and shaping strategies that reflect their current and future needs and priorities. Every plan is tailored to the people, assets and relationships involved and designed to stand up to the test of time.

We often advise clients through major life events that call for strategic, forward-looking planning, such as starting a business, growing and caring for a family, supporting cherished causes, or preparing for a transition.
