

Design & Construction Contracts

Whether a complex tenant improvement for a corporate campus or a design-build agreement for a new housing development, Shartsis Friese's attorneys focus on facilitating project collaboration by structuring documentation that clarifies expectations and mitigates risk.

Supporting clients through all phases of project development, from contract structuring to execution and occupancy, we help project owners, architects, designers and contractors manage risk and move projects forward through careful planning, contract negotiation and strategic problem-solving. Our team represents clients throughout the design and construction process, with a focus on aligning legal terms with project goals and protecting our clients' positions when challenges arise.

We have guided owners through high-value, high-visibility developments across a range of industries, including corporate campuses, entertainment venues, academic institutions and historic properties. Our work is grounded in a practical understanding of construction risk and a commitment to helping clients complete complex projects efficiently and with minimal disruption.

Experience

- Represented Wilson Meany, a leading California developer, and its development partners in connection with architectural agreements and construction contracts for more than 472 apartment units and 1.25 million square feet of office space at the Bay Meadows

RELATED ATTORNEYS

[Kathleen Keeler Bryski](#),
